

HOLDEN RG Colorado Structural Parts Restriction

As an enhancement in the serviceability of the Holden RG Colorado, GM Australia & New Zealand (GMANZ) are making available certain Chassis Repair parts. As these parts form a key part of the vehicle structure, their replacement should only be completed by capable repairers with the proper training, tools and equipment.

Collision repair centers that are a part of the Australian GM Certified Collision Repair Network (CRN) will be the only repairers permitted to receive the restricted structural part numbers from an authorised Holden Parts outlet in Australia.

These structural Chassis frame components for the Holden RG Colorado will be put on parts restriction. The following images show the components of the frame assembly that will be on parts restriction. The full current list is also at the end of this document.

How to order RG COLORADO Chassis Repair Parts

Structural Chassis Repair parts for the RG Colorado require a special ordering process. Due to the advanced materials and unique welding methods used to create RG Chassis frame, only GM Certified Repairers authorised to complete Chassis Part replacement repairs can place orders for Chassis Repair parts.

Orders for structural collision parts will be restricted and will follow the process below. Orders for parts not outlined below or Restricted for sale will continue to follow the normal order writing process.

The process for ordering Holden RG Colorado restricted Chassis Repair parts is as follows:

- The GM Certified Collision Repairer is to order the required part from an authorized Holden Parts outlet
- When a Holden Parts Outlet receives an order for restricted Chassis Repair parts, they will need to provide the following details to GM ANZ by emailing restrictedparts.gmanz@gm.com before the parts will be supplied :
 - The Repairer requesting the parts name, address & contact details
 - The GMTP member number for the Repairer
 - The Holden RG Colorado VIN number
 - A copy of the approved Estimate for the repair showing the part required.
- Once these details have been received they will be checked and if all details match & the requirement is confirmed, an order will be loaded by GM Order Management. Parts will then be supplied through normal Holden Parts supply processes.

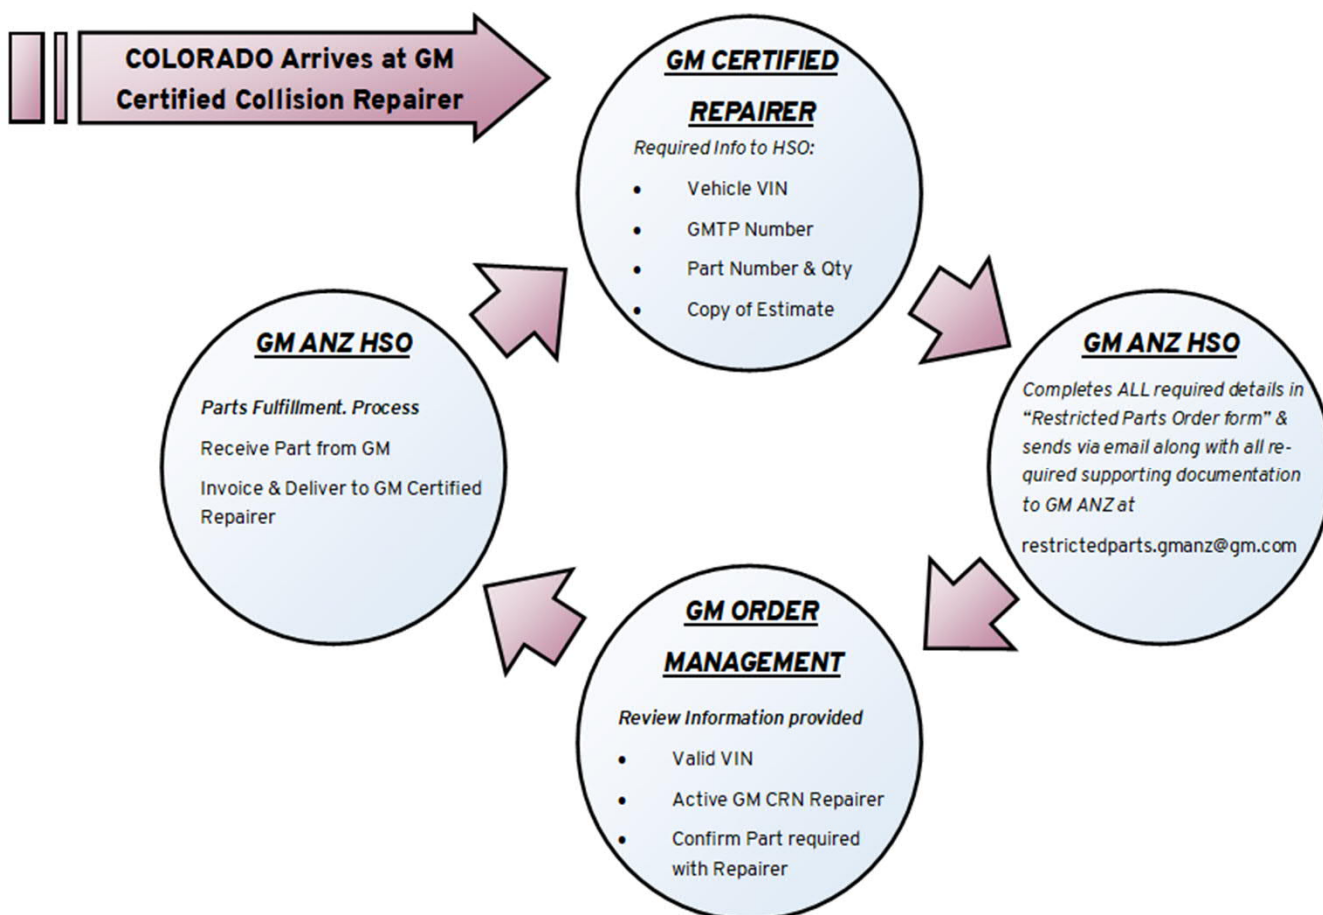

If the RG Colorado VIN # is invalid and/or GMTP number is not a current GM Certified Collision Repairer, GMANZ Order Management will reject the order. If the requirement for the part cannot be confirmed satisfactorily with the GM Certified Repairer, the order will be rejected.

Be aware that GMANZ Order Management is not able to answer questions regarding the GM Collision Repair Network.

If you have questions regarding your GM Collision Repair Network status or participating in the Collision Repair Network, please contact the helpdesk below.
 Repairers interested in becoming a part of the GM CRN can review further detail on the program including the requirements at <https://gmtradeparts.com.au/w/certified-collision-repair-network>

GM Certified Collision Repair Network Helpdesk
 Email: gmaccidentcare@iss-solutions.com.au
 Phone: 03 8769 0234

Please note that Parts will NOT be supplied to Repairers who are in the process of applying to become a part of the GM CRN. They will only be supplied once the application has been approved & completed.

GM Collision Repair Network

Collision Repairers that hold a minimum i-Car Australia certification level of GOLD that wish to become part of the GM Collision Repair Network can review the available information and begin the application process by visiting:

<https://gmtradeparts.com.au/w/certified-collision-repair-network>

Note that completing the application does not guarantee membership

The GM Collision Repair Network incorporates performance measurements on pre- and post-repair scans, usage of OEM repair procedures, usage of brand new Genuine GM parts, completion of recalibrations and quality-control checks.

The GM Collision Repair Network is designed to provide tools to assist in the delivery of a positive experience for those GM vehicle owners who require collision repair services. All participating facilities adhere to these core program values.

For the replacement of all these restricted Chassis Parts, specific equipment, training & expertise is required and is noted as such within the GM repair procedures.

Repairers that are not a part of the GM Certified Collision Repairer Network (CRN) should redirect the vehicle to a GM CRN facility that meets this qualification.

Log on to the GM Certified Collision Repair Network section of the GM Trade Parts website at: <https://gmtradeparts.com.au/w/certified-collision-repair-network> for more information regarding Collision Repair Network participation, RG Colorado structural parts list and active GM CRN shop list.

Frequently asked questions:

Why is GM ANZ putting parts restriction on these parts?

- *The chassis on the Holden RG Colorado is made of multiple grades of complex steels, which includes component parts containing very hi-strength steel grades. To ensure that integrity of the vehicle during a collision repair that supports safety and maintains a high level of customer satisfaction structural repair of this vehicle should only be done by qualified collision Repairers that have been vetted to have the proper training, tools and equipment.*

How does a GM Certified Repairer order restricted RG Colorado Chassis Repair structural parts?

- *See above workflow diagram on how to order restricted structural parts.*

Can any Holden Parts Outlet order these parts for a GM CRN facility?

- Yes.

Are cosmetic parts (fascia, doors, lighting, etc...) included?

- *No, cosmetic parts can be ordered and used by any collision repair shop.*

Is a fixture bench required to do most structural repairs?

- Yes.

RG Colorado Restricted Parts List

Please note that part numbers may change, and parts may be added to this list at any time. Supersessions to & from Part Numbers in this list will also be included as Restricted Parts.
